

ESP 32 MODULE

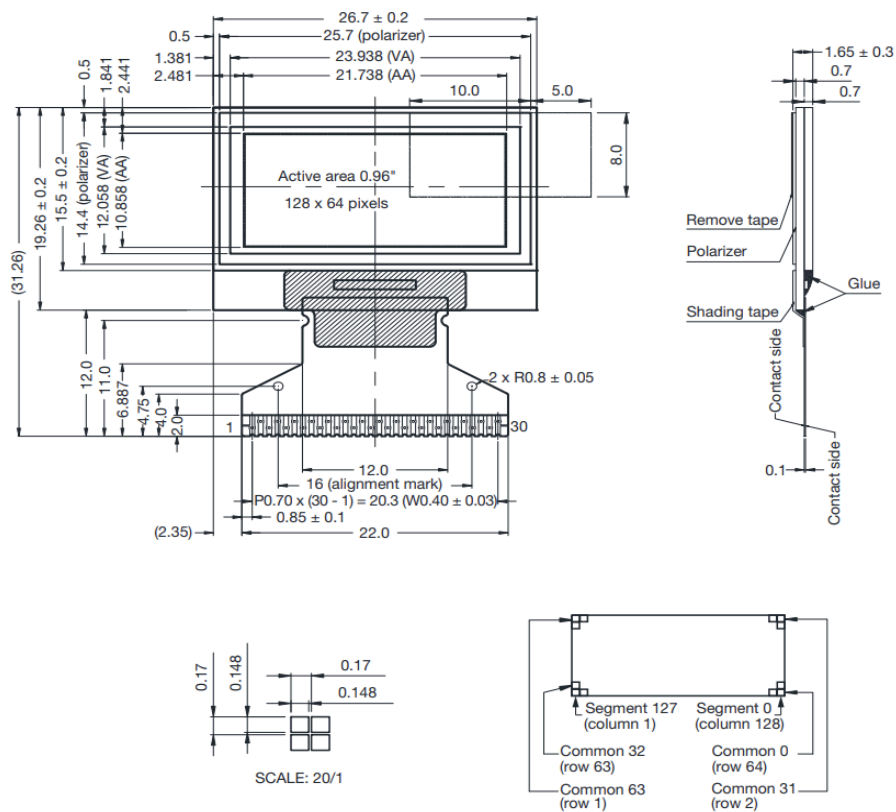

LASER SENSOR(top&inside dispenser)

OLED DISPLAY(front)

DIMENSIONS in millimeters

The non-specified tolerance of dimension is ± 0.3 mm.

PHOTO RESISTOR

INTRODUCTION

Photoresistor Sensor Module are sensors that allow you to detect light. They don't wear out. For that reason they often appear in toys, gadgets and

FEATURES

- Using sensitive photosensitive resistance sensor
- The comparator output signal is clean, good waveform, driving ability
- With adjustable potentiometer to adjust the brightness of the light
- The working voltage 3.3V-5V
- The output form: DO digital switching outputs (0 and 1) and AO analog
- A fixed bolt holes for easy installation
- PCB Size: 3.2cm x 1.4cm
- Using a wide voltage LM393 comparator

Power MOSFET

TO-220AB

N-Channel MOSFET

PRODUCT SUMMARY		
V_{DS} (V)	100	
$R_{DS(on)}$ (Ω)	$V_{GS} = 10\text{ V}$	0.27
Q_g max. (nC)	16	
Q_{gs} (nC)	4.4	
Q_{gd} (nC)	7.7	
Configuration	Single
